

3 Digit Subtraction Split

Materials: 3 Digit Subtraction Split Cards

1. Choose a card from the pile.
2. Solve the problem on the card by decomposing the numbers into hundreds, tens and ones before subtracting. Show your work.

Example: $259 - 125$

$$\begin{array}{r} 200 + 50 + 9 \\ - 100 + 20 + 5 \\ \hline 100 + 30 + 4 = 134 \end{array}$$

3. Sometimes you have to split the larger number so that each part is larger than each part of the smaller number.

Example: $764 - 436$

$$\begin{array}{r} 700 + 50 + 14 \\ - 400 + 30 + 6 \\ \hline 300 + 20 + 8 = 328 \end{array}$$

4. Repeat with other cards from the pile.
